

Course Code	21CSE463T	L T P C	Ex 3 0 0 3
Course Title	CLOUD STRATEGY PLANNING AND MANAGEMENT	Faculty Name	Dr. S. Prabakaran
Semester	ODD 2026-27	Email:	prabakes@smist.edu.in
Pre-requisite / Co-Requisite	NIL	Slot & Class Hours:	C Slot Batch I - Day3(1,2), Day5 (03)
Lecture Hall #	LH1313 & LH1314 - TECH PARK II	Laboratory Location	NA

Organisation of the course

The course will be delivered mainly through interactive lectures supported by PPTs, board work, illustrations, and real-world cloud examples. Selected sessions will include group discussions, in-class activities, tutorials, case-based analysis, and application-oriented tasks. Students will also participate in experiential learning through Vibe Coding, a cloud-based mini project, and Microsoft Azure certification training. Where possible, industry experts or invited guest speakers will be involved to provide practical exposure to current cloud technologies and professional practices.

Course Outcome(s)

- 1 Demonstrate how cloud computing enables IT Transformation and business value in an organization
- 2 Examine the role that cloud computing can play in the business process
- 3 Appraise how the incorporation of cloud computing in an IT strategy can deliver on strategic business objectives
- 4 Critique how cloud computing and Service Oriented Architecture (SOA) can deliver business agility
- 5 Implement IT governance to manage business realization from cloud IT services

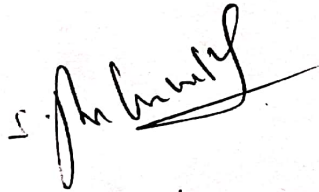

Learning Materials

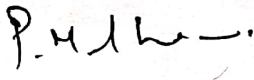

1. Dimitris N. Choralas: Cloud Computing Strategies, CRC Press, 2011.
2. Arnold J Cummins, "Easiest Ever Guide to Strategic IT Planning" <http://strategicitplanningguide.com/>.
3. David S. Linthicum, "Cloud Computing and SOA Convergence in Your Enterprise", Addison Wesley [ISBN: 0136009220], 2009.
4. Charles Babcock, "Management Strategies for the Cloud Revolution", 1st Ed., Tata McGraw/Hill [ISBN: 0071740759], 2010.

Course Topics and Schedule

Unit / Module No.	Topic Name	No. of Hours	Method of delivery (Multi-Select)	Assignment(s) / Activities	Learning materials to be referred	CO	Related PO
1	The four pillars of cloud computing - Cloud applications and platforms providing the cloud Infrastructure	1	Lecture	Experiential Learning vibe coding	L1	1	
1	Cloud computing - Spectral efficiency - Sensors and perspiration - Strategic infection points in Information Technology	2	Presentation		L1	1	
1	Cloud computing and its slogans - User centered solution and cloud computing - For cloud vendors infection point is risk and opportunity	2	Presentation		L1	1	
1	Potential customers of cloud technology - The cloud interests Small and Medium enterprises - Virtual companies and the cloud	2	Lecture		L1	1	
1	Virtual networked objects - Consumer technologies and the cloud - Social networks and multimedia messaging	2	Group Activity		L1	1	
Total Hours (It may vary as per syllabus)		9					
2	Moving to a cloud architecture and strategy to achieve business value - BPM, IS, Porter's Value chain model and BPR as a means of delivering business value	2	Lecture		L1	2	
2	Developing Business Strategy: Investigate business strategy models to gain competitive advantage for organizations - SWOT/PEST, Economies of scale	2	Presentation		L1	2	
2	Porter's 3 Strategies and 5 Competitive Forces, D'Aveni's hyper competition models - Emphasize the roles of the strategic IS/IT leaders such as Chief Information Officer (CIO) - The Chief Technology Officer (CTO) in planning and managing IT Strategic development in the organization	2	Presentation		L1	2	
2	Budgeting for cloud computing - Service level agreements - Outsourcing, Infrastructural inter dependencies, and the cloud - Human resources at the CIO level - The transition from legacy to competitive system	3	Presentation		L1	2	
Total Hours (It may vary as per syllabus)		9					
3	Develop an IT strategy to deliver on strategic business objectives in the business strategy - IT Project planning in the areas of IaaS is essential in delivering a successful strategic IT Plan	2	Lecture		L2	3	
3	IT Project planning in the areas of SaaS is essential in delivering a successful strategic IT Plan - IT Project planning in the areas of PaaS is essential in delivering a successful strategic IT Plan	2	Lecture		L2	3	
3	IT Project planning in the areas of IaaS is essential in delivering a successful strategic IT Plan - Searching for an open architecture	2	Presentation		L2	3	
3	Infrastructure as a Utility - Cloud System Architecture and its primitives - The User Organizations Business Architecture - Financial Services Applications Architecture	3	Presentation	Industry Usecase(Mini Project) + Global Certification	L2	3	
Total Hours (It may vary as per syllabus)		9					
4	Shared services delivered by a Service Oriented Architecture (SOA) in a Private or Public Cloud	2	Lecture	Industry Usecase(Mini Project) + Global Certification	L2	4	
4	Services, Databases and Applications on demand - The effect on Enterprise Architecture and its traditional frameworks such as Zachman	2	Lecture		L2	4	
4	The Open Group Architecture Framework (TOGAF) - Customer Relationship Management - Enterprise Resource Planning	2	Presentation		L2	4	
4	Just-in-Time Inventories - Machine-to-Machine and RFID Communications - Challenges Presented by Organization - Challenges Presented by Commercial vision	3	Lecture		L2	4	
Total Hours (It may vary as per syllabus)		9					

5	Benefit Realization and IT Governance - Managing resources (people, process, technology), to realize benefit from Private/Public Cloud IT services	2	Lecture	Industry Usecase(Mini Project) + Global Certification	L3	5	
5	Gartner's 5 pillars of benefit realization - IT governance as a service in measuring the delivery of IT Strategy from Cloud IT Services using Sarbanes Oxley (CobIT) and other commonly-used approaches	2	Presentation		L3	5	
5	High Technology for private banking and Asset Management - Cloud Software for Private Banking - Leadership is based on Fundamentals	2	Lecture		L3	5	
5	Cloud Software For Asset Management - Cloud Technology can Improve Fund Management - Criteria of Success in Asset Management Technology	3	Lecture		L3	5	
5		9					
Total Hours (It may vary as per syllabus)							
Grading Criteria							
Type of assessments	Deadline	Weightage	Due Date (If applicable)	Component			
FT-I	Week-3	5%	11.8.26	Experiential Learning vibe coding			
FT-II	Week-6	15%	31.8.26	Written Test - I			
FT-III	Week-12	15%	16.10.26	Written Test - II			
FT-IV	Week-16	15%	30.10.26	Mini Project with any Cloud service providers			
LLT-I	Week-16	10%	21.10.26	Global Certification - AZ-104 — Microsoft Azure Administrator			
Continuous Assessment	Total	60%					
End Semester Examination		40%					
	Total	100%					
Make-up Policy							
Assignments / Term Project							
Proper academic performance depends on students doing their work not only well, but on time. Accordingly, assignments for this course must be received on the due date specified for the assignment. No Make-up will be available for term project. Late submissions will be evaluated at 25% less weight for that component for a delay of up to 24 hours after which no submissions will be accepted.							
Test							
Make-up test is usually not permitted, but in case of very genuine reasons as decided by the course faculty, course coordinator/audit professor special prior Permission is usually required to get a make-up test. It cannot be taken as a right to claim the test marks.							
Academic Integrity							
Plagiarism or cheating will result in a grade of zero for the assignment or exam. Severe cases may result in course failure.							
Contact Information							
Feel free to reach out to Dr. S. Prabakaran via email for any questions regarding the course material. For urgent matters, you can visit the faculty room during office hours.
